

Assignment 3

```
#!/bin/bash

# 1.create a user with fix uid(hpc1, 1026)
sudo useradd -u1026 hpc1

# 2.add user with comment (high performance computing)
sudo useradd -c " high performance computing " wbl2

tail -l /etc/passwd

# 3.modify GID for the hpc user as 1028
sudo usermod -u 1028 hpc1

id hpc1

# 4.delete hpc1 user with their directory
sudo userdel -r hpc1

id hpc1

# 5.create programing1 user
sudo useradd programing1

id prgraming1

# 6.assign node1 as a primary and cluster1 as a secondary group of programing1 user

#create group node1 and cluster1
sudo addgroup node1
sudo addgroup cluster1

tail -l /etc/group

#assign node1 and cluster1
sudo usermod -g node1 programing1
sudo usermod -G cluster1 programing1
id programing1

# 7.delete programing user without delete user directory

sudo userdel programing1
```

Output

```
astha@cdac:~$ ./practical2.sh
